

Bike Sewa

(B C A - 6th S E M E S T E R)

Presented by:

Ngima Sherpa (07)

Date:30th May 2022

Introduction

- Web based application
- The admin side and the user side are both included
- User can login , update profile ,add/update bike, online booking, view old servicing record through online
- Admin can do CRUD operation on customer/bike/mechanic, and can view total customers, bikes, accepted booking, mechanic.

Existing Problem

- Customer can't book online for servicing
- Customer can't view old servicing details
- Customers have to wait in the queue

Objectives

The main objective of this project is as following.

- To book servicing through online
- To view old servicing records
- To get feedback from customers to analyze the company services from the customer point of view
- To Provide better services to customer

Limitation

- Online payment is not present
- The customer has to book for service with a time slot
